Beautify
YOUR HOME
with
ESPALIER
FRUIT TREES

This Espalier peach tree provides an attractive background for the patio and grows peaches for the family table.

Espalier pear trees trained on a trellis against the side of this house form a screen to beautify the wall. Photo shows simple trellis made of pipe and wire.

Espalier Fruit Trees "Grow Like Vines" ... and Provide Delicious Fruit for Your Table

BEAUTIFY your home with an orchard growing on vines! Registered U.S. Espalier Fruit Trees grow in artistic vine-like patterns against any wall, trellis or fence. They yield an abundance of delicious fruit that is often larger and richer than fruit from regular trees. Developed in Switzerland where garden space is limited, these unique trees are now available in America and add a distinctive touch of beauty to any home or garden.

Blossoms in Spring . . . Fruit in Autumn

Espalier Fruit Trees enable you to bring the full springtime glory of blossoming fruit trees into your own yard. They afford a garden decoration that is distinctly different. You can train them around windows, plant them against a fence or plant them in rows to form a hedge. Many homes are creating beautiful arbors and outdoor living rooms with Espalier

Fruit Trees forming beautiful green walls of foliage that ripen with fruit during summer and autumn.

Variety of Designs Almost Unlimited

The adaptability of Espalier trees is limited only by the imagination. T-shapes, U-shapes, palmettes, canelabra, horizontal and vertical cordons, pyramids and many other interesting designs can be worked out to fit any space in your yard.

No More Space or Care than Rose Bush

Genuine Espalier Fruit Trees are propagated from true dwarf roots and scions which limit their size and growth. They require no more space or care than a small shrub or climbing rose. U.S. *Registered* Espalier Fruit Trees are guaranteed to be dwarf-grown from original imported Swiss stock.

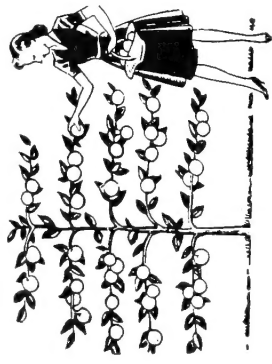

This Espalier pear tree, trained as a horizontal cordon, turned a blank wall space into a beautiful addition to this outdoor living room.

An **ESPALIER TREE** represents **ECONOMY** as well as **BEAUTY**

REGISTERED U. S. ESPALIER FRUIT TREES

are Decorative...and Bear Fruit

Espalier Fruit Trees provide one of the most interesting of all garden hobbies because they lend themselves so well to creative genius. The limbs of these dwarfed, vine-like trees are very pliable, permitting the tree to be trained into any number of interesting patterns.

As known in America, Espalier trees are dwarfed approximately 100 per cent. You can stand on the ground and pick the fruit from the top of a full-grown tree. The trunk of a full-grown espalier usually measures no more than 3 or 4 inches in diameter. Thus most of the tree's strength goes into an abundant crop of fruit that is usually larger, finer in texture and richer in flavor than ordinary tree fruit.

Plant in Tubs for Porches or Terraces

Because of their limited size, there are many uses for Espalier Fruit Trees. A western penthouse terrace is bordered with six Espalier Fruit Trees

grown in tubs—each one bearing a different kind of fruit! When planted in rows, espaliers make a colorful fence or hedge to border or separate different parts of the garden.

Easy to Train and Prune

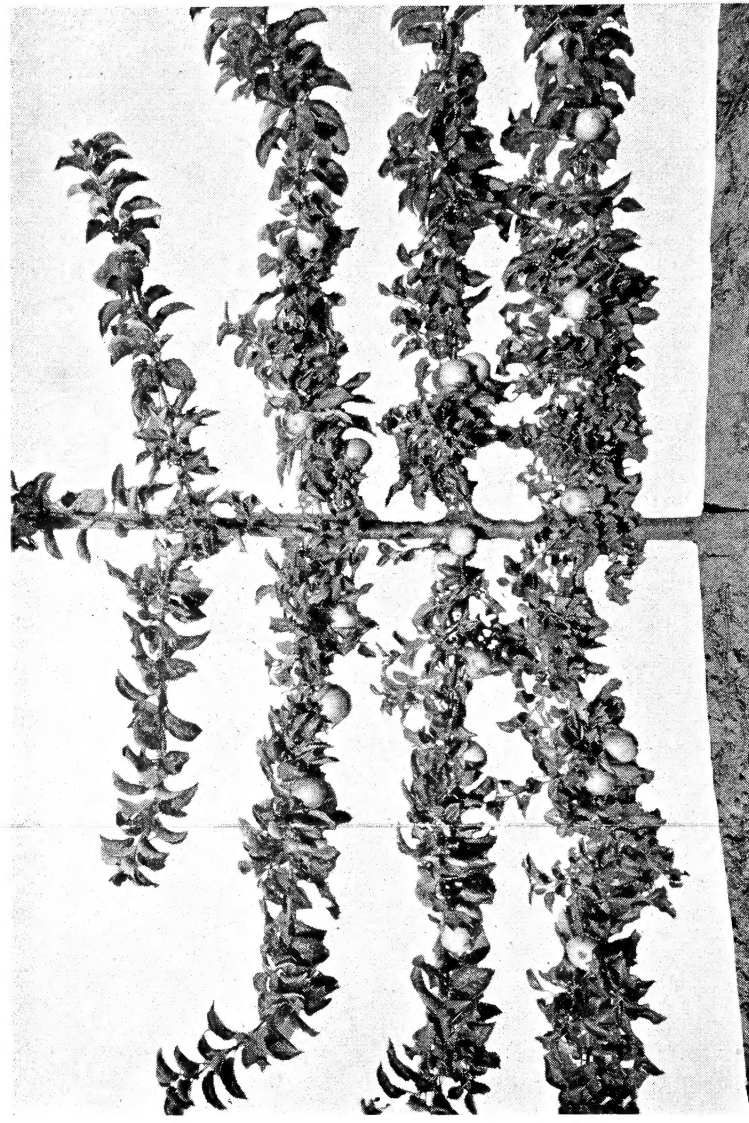

Espalier Fruit Trees will appeal to growers who like to care for their own gardens as well as to owners of large estates having professional gardeners in charge. These unique trees require but a few minutes' attention each month to keep them trained in the desired pattern. Pruning is a simple task, performed during the growing season. Complete instructions for planting, building a trellis, training and pruning are attached to every Registered U. S. Espalier Tree.

Every Tree Registered and Guaranteed

All U. S. Registered Espalier Trees are guaranteed to be dwarf-grown from original imported Swiss stock and are warranted to grow and produce fruit of true variety.

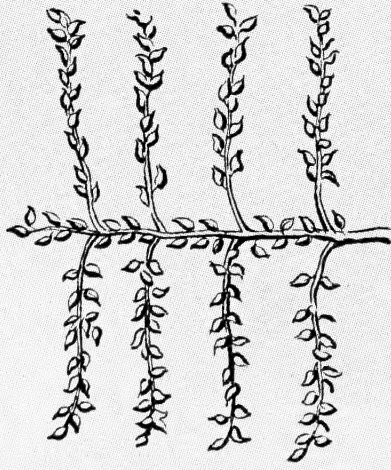

Here's an idea for victory gardens. Espaliered apples, peaches, pears and plums border the vegetable garden and supply the owners with an abundant crop of delicious fruit.

An ESPALIER TREE represents ECONOMY as well as BEAUTY

Espalier apple tree, 21 years old, adds a distinctive touch of beauty to this barn in Switzerland.

A RARE TREAT from Switzerland

It took more than 60 years of trial and research in Switzerland to bring the Espalier Fruit Tree to perfection. Because their garden space is so limited, Swiss gardeners readily adopted it and the art of espaliering fruit trees quickly spread throughout Switzerland and France. U.S. Registered Espalier Trees have brought the charm and utility of this Old World discovery to America. Every Registered U.S. Espalier Tree is developed from genuine Swiss espalier stock imported to this country in 1928.
